10 June 2012

TO WHOM IT MAY CONCERN

I hereby wish to confirm, that we have installed a complete Schneider home-automation system at our premises at 6 Rusch Street, Klein Windhoek. The system covers all aspects of home/office automation, including many light (some with dimmable circuits) and audio circuits, and interfaces with different (2) audio systems, a security system, pool lighting and filtration, irrigation and entrance control. This project was completed at the beginning of April 2012 and has been fully functioning since then, without any problems and/or interruptions.

The Schneider System was provided by Green Wave Automation cc (of Cramerview, Johannesburg) under the personal supervision of Mr Nigel Armstrong. The initial advice and subsequent service was outstanding. This included discussion and recommending the correct system for our specific needs, on-time delivery of components, continual installation advice to the electricians during the construction phase (with site-visits when required), connecting up and commissioning when completed, with subsequent follow-up advice and adjustments as required by us. Throughout the project, Green Wave Automation stuck to all deadlines and delivered as promised.

Overall, we can say that we were extremely happy (and fortunate) that we have chosen Green Wave Automation for our project and can only recommend them to any other interested customer.

Best regards,

Dr. Günter G. Lempert
