To whom it may concern

BUILDING MANAGEMENT SYSTEM

Ukhozi Consulting was the electrical and mechanical consultants for the development of Menlyn Corporate Park. The development includes three office blocks totaling 24 000m²

Mr. Nigel Armstrong of Greenwave Automation performed the installation of a Schneider (TAC) building management system (BMS) for the development.

The BMS provides monitoring and partial control of the following systems:

- Heating, ventilation and air conditioning (HVAC)
- Fire detection
- Power consumption
- Lifts
- Standby generators
- External lighting

We were satisfied with Greenwave Automation's performance and quality of workmanship and would recommend them for any similar projects. The project was completed in December 2010.

Yours faithfully

UKHOZI CONSULTING
